

ORGLIME DEO

ORGLIME DEO is a nitrogen and boric acid free delimiting agent

Appearance : White granular powder
Base : Mineral and Organic compounds
pH (1/10) : 1.5-2.5

PROPERTIES

ORGLIME DEO

- Boric acid free delimiting agent hence there is no problem in aerobic treating of effluent.
- Environment pollutions are reduced as the product does not release nitrogen.
- Can be used in delimiting process without fear of acid swelling.
- A quick full delimiting is achieved by using **ORGLIME DEO** during Eco wet process.
- Gives very clean pelts with fine grain.

APPLICATIONS

All types of leather can be treated with **ORGLIME DEO** in short and long floats. It is not necessary to dilute **ORGLIME DEO**

Sheep 1.5 – 2.0% **ORGLIME DEO** on pelt wt
Cow 2.5 – 3.5% **ORGLIME DEO** on pelt wt

Normally the quantity will not exceed 3.5% depending on the thickness of the leather. To accelerate Delimiting 0.3 to 0.5% of (NH₄)₂SO₄ can also be used.

SHELF LIFE

ORGLIME DEO has a shelf life of one year if it is stored in its original sealed package. Bags should be tightly closed each time material is taken from them.
