

## G BIND 115

---

Soft acrylic resin binder with uniform fine particle size

### Specification

<b>Composition</b>	: Acrylic Emulsion
<b>Aspect</b>	: Bluish Translucent Liquid
<b>Solid content</b>	: $30 \pm 1.0$ %
<b>Charge</b>	: Anionic
<b>pH of 10 % emulsion</b>	: 6.0 – 7.5
<b>Film property</b>	: Transparent, Very Soft & Elastic film
<b>Solubility</b>	: Water Soluble

### Salient feature

- Very soft resin binder, clear transparent with elastic and flexible film
- Good penetration properties on all types of leather
- Excellent flexibility, high elongation and does not increase the temper of the leather
- Very good adhesion for base coat formulation

### Mode of application

- **G BIND 115** Can be used for base coat formulation along with the **G BIND 108**
- **G BIND 115** can be used in the formulations of base coat and surface impregnation of full and corrected grain leathers
- Suitable for sheep nappa, suede nappalan and all other type of garment finishes

Use level of **G BIND 115** may vary from 100 – 150 parts per litre depends on the finishes
