

G BIND 119

Medium Soft Self Cross linkable Acrylic Resin Binder

Specification

Composition	: Acrylic Emulsion
Aspect	: Milky White
Solid content	: 30 ± 1.0 %
Charge	: Anionic
pH of 10 % emulsion	: 5.5 – 7.0
Film property	: Medium Soft Slightly Tacky Film
Solubility	: Water Soluble

Salient feature

- Medium soft resin binder
- Elastic and flexible film
- Good penetration
- Excellent Mechanical stability
- Very good print retention and plate release
- Excellent flexibility, high elongation and does not increase the temper of the leather
- Very good adhesion for base coat formulation

Mode of application

- **G BIND 119** can be used for base coat formulation along with the **G BIND 115**
- Excellent wet rub and dry rub fastness
- Protein and Wax emulsion can be used along with **G BIND 119** to modify its film property
- **G BIND 119** can also be used for surface impregnation of full and corrected grain leathers

Use level of **G BIND 119** is 100 – 150 parts per litre
