

G BIND 63

Medium Soft Micro Fine Particle Sized Acrylic Binder

Specification

Composition	: Acrylic Emulsion
Aspect	: Translucent Binder
Solid content	: $35.0 \pm 1.0 \%$
Charge	: Anionic
pH of 10 % emulsion	: 5.5 – 6.5
Film property	: Transparent, very soft & elastic film
Solubility	: Water Soluble

Salient feature

- Medium soft elastic & flexible film
- Non tacky universal binder to be used alone or in combination.
- Excellently useful for Aniline and semi-aniline finish due to Micro-fine particle size
- Improves adhesion, when used alone or in combination, so protects during tape test

Mode of application

- **G BIND 63** can be used alone in case aniline / semi-aniline finish
- Escalated performance when used in semi-aniline finish with **G Bind 239 / 108**
- For Embossed shoe upper, it can support **G Bind 35 / 41** for better adhesion with the substrate
