

GG Organics New Factory in Ranipet to Support Leather Chemical Manufacturing!

We are delighted to share some remarkable news with you – the establishment and grand opening of GG Organics' state-of-the-art factory in Ranipet for manufacturing top-quality leather chemicals. The momentous event, held on March 3rd 2023, marked a significant milestone in our journey towards becoming a leading provider of sustainable and innovative solutions to the leather industry.

At GG Organics, we take immense pride in our commitment to sustainability and responsible manufacturing practices. Our new factory in Ranipet integrates eco-friendly measures throughout its operations, including energy-efficient systems, waste reduction strategies, and stringent environmental controls. By embracing the principles of a circular economy, we strive to minimize our ecological footprint and contribute to a greener and more sustainable future.

This new factory will play a vital role in enhancing our production capacity, enabling us to meet the ever-growing demands of our esteemed customers. With increased

manufacturing capabilities, we are now better positioned to provide a broader range of innovative solutions that elevate the quality and performance of leather.
